1-Chloro-1-[(4-methoxyphenyl)hydrazinylidene]propan-2-one

A. M. Asiri, A. O. Al-Youbi, M. E. M. Zayed and S. W. Ng

Abstract: The non-H atoms of the title compound, C₁₀H₁₁ClN₂O₂, lie nearly on a plane (r.m.s. deviation = 0.150 Å), and the C=N double bond has a Z configuration. In the crystal, adjacent molecules are linked by an N-H...O_{carbonyl} hydrogen bond, forming a chain running along [201].
