

A NEW TECHNIQUE FOR CLOSURE OF CHRONIC ORO-ANTRAL FISTULA .

THE NEW EGYPTIAN JOURNAL OF MEDICINE , 9 :300-302 , 1993.

طرق جديدة لإغلاق الناسور الفم - أنفى المزمن .

ABSTRACT :

A new technique for closure of chronic oro-antral fistula is described .In this technique , the fistulous tract is everted towards the oral cavity through the opening of the fistula .Then , instead it is incised and removed as usual , it is sutured with the surrounding mucoperiostium .It is a relatively simple procedure , neither a graft nor an alloplastic material or others is needed .This technique proved effective in closing all cases
