Faith Meanings of the Allah's name AL-Haqq (the True) and its Effects on the Individual and Society “A Doctrinal Study”

Abstract

This study includes an introduction, three chapters and a conclusion. The introduction deals with the research problem, objectives, importance, reasons for choosing this research, previous studies, research methodology, research limits, and research plan. The first chapter includes four sections where I defined the Allah's name AL-Haqq (the True) and its meaning. The second chapter, however, discusses the proof of the attribute of truth in God, in His Name, His Attributes and His Essence. Faith effects of AL-Haqq on the individual and society are discussed in chapter three in three sections. The study concludes that the linguistic meanings of AL-Haqq are harmonious with each other. These linguistic meanings are derived from the fact that AL-Haqq means faith and belief accepted by the individual who must truly believe that God is True and that His Actions and Sayings are True. This entails believing that His Books and Messengers are true, for truth is the opposite of falsehood.
