Research Details :

Research Title : Peripheral and Mural Ameloblastoma in
Peripheral and Mural Ameloblastoma in

Descriptipn : Peripheral ameloblastoma (PA) is a relatively uncommon odontogenic tumor that is histologically identical to the classic intraosseous ameloblastoma but it occurs primarily in the soft tissues overlying the toothbearing regions of the jaws and does not exhibit the invasive and aggressive behavior of its intraosseous counterpart.1

Research Type : Thesis

Added Date : Thursday, December 06, 2007
