Research Title : EVALUATION OF BOND STRENGTH AND SCANNING
EVALUATION OF BOND STRENGTH AND SCANNING

Descriptipn : The purpose of this study was to evaluate bond strength of two adhesive systems to sclerotic and normal dentin, as compared to glass ionomer cement restoration material. The microstructure of [he interface between glass ionomer cement, the adhesive systems / dentin was examined using scanning electron microscope Two dentin bonding systems were used in this study Scotchbond Multi-Purpose (fourth generation) and Syntac (third generation with their composite Wresin (Z10 and Helimolar)

Research Type : Thesis

Added Date : Wednesday, January 02, 2008
